Crosshill, . 584

* The actual number of Districts is 1051—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 5 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.

# REPORT.

TO THE RIGHT HON.

SIR GEORGE OTTO TREVELYAN, BART., M.P.,

*Her Majesty's Secretary for Scotland.*

GENERAL REGISTRY OFFICE OF BIRTHS, ETC.,

EDINBURGH, 23*rd December* 1893.

SIR,

I had the honour in 1892, in conformity with the requirements of the seventh section of the Scottish Registration Act, 17 and 18 Vict., cap. 90, to transmit to you as Her Majesty's Secretary for Scotland, General Abstracts of the Births, Deaths, and Marriages registered in Scotland during the year 1891, along with the usual explanation and commentary.

At the same time, my Twenty-seventh Annual Report on Vaccination was transmitted, in accordance with the nineteenth section of the Scottish Vaccination Act, 26 and 27 Vict., cap. 108.

I have now the honour to transmit the Detailed Annual Report, together with the relative Tables, regarding the Births, Deaths, and Marriages registered in Scotland during the same year (1891).

I have the honour to be,

SIR,

Your most obedient Servant,

STAIR AGNEW,

*Registrar-General.*

# REPORT TO THE REGISTRAR-GENERAL,

BY R. J. BLAIR CUNYNGHAME, M.D., F.R.S.E.

SIR,

As bearing upon the welfare of the community it may be noted that during the year (1891), there was throughout Scotland a general prevalence of northerly and easterly winds, and a diminution of those from a westerly direction.

The temperature on the mean of the year was slightly above the average in the west of the country, where there was also the greatest rainfall, the reverse as to both occurring in the east. The hours of sunshine were de-deficient—specially so during the months of July and August.

TABLE I.—Population estimated to the middle of each year; with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1891, and their Proportion to the Population; also the Excess of Births over Deaths, the Illegitimate Births, and their Proportion to the Total Births.

| YEARS | Estimated Population. | BIRTHS. | | Deaths. | Marriages. | Excess of Births over Deaths. | Percentage to Population. | | | Percent. of Illegit. to Total Births. |
|---|---|---|---|---|---|---|---|---|---|---|
| | | Total. | Illegit. | | | | Births. | Deaths. | Marriages. | |
| 1855 | 2,978,065 | 93,349 | 7,357 | 62,004 | 19,680 | 31,345 | 3·1491 | 2·0820 | 0·6608 | 7·8 |
| 1856 | 2,995,771 | 101,821 | 8,695 | 58,529 | 20,740 | 43,292 | 3·3988 | 1·9537 | 0·6923 | 8·5 |
| 1857 | 3,012,310 | 103,415 | 8,869 | 61,906 | 21,369 | 41,509 | 3·4331 | 2·0551 | 0·7094 | 8·5 |
| 1858 | 3,027,665 | 104,018 | 9,354 | 63,539 | 19,655 | 40,479 | 3·4356 | 2·0986 | 0·6492 | 8·9 |
| 1859 | 3,041,812 | 106,543 | 9,715 | 61,714 | 21,201 | 44,829 | 3·5026 | 2·0288 | 0·6969 | 9·1 |
| 1860 | 3,054,738 | 105,629 | 9,736 | 68,170 | 21,225 | 37,459 | 3·5578 | 2·2316 | 0·6948 | 9·2 |
| 1861 | 3,069,404 | 107,009 | 9,929 | 62,341 | 20,896 | 44,668 | 3·4863 | 2·0310 | 0·6808 | 9·2 |

thousand of the inhabitants, and is the largest number since the year 1886. The mean annual birth-rate for the last ten years is 323 in like proportion. The births exceed the deaths during the year by 42,413.

Of the total births 9647 are illegitimate—a somewhat larger number than during the previous year 1890.

The total number of male infants born during the year is 64,769, and of female 61,217, the former exceeding the latter by 3552.

---

| SCOTLAND . . | 64769 | 61217 | 125986 | 59777 | 56562 | 116339 | 4992 | 4655 | 9647 | 1372 | 14 |

Of the 9647 illegitimate births registered during the year 4992 are males and 4655 females, and are equal to 7·66 per cent. of the total births. In the Principal Town Districts 3796 of such are registered, males 1972, females 1824, equal to 7·24 per cent. of the total occurring there; in the Large Town Districts they number 971, males being 509, females 462, together equivalent to 6·11 per cent. of all; in the Small Town Districts they are 1939, males 1034, females 905, equal to 7·22 per cent. of all; in the Mainland-Rural Districts they are 2788, males 1380, females 1400, and form 9·97 per cent. of all the births therein registered; and in the Insular-Rural Districts they are 153, the males 89, the females 64, being 5·35 per cent. of the whole. Or in other words one birth in every thirteen in Scotland is illegitimate. In the Principal Town Districts one in nearly every fourteen is of like nature; in the Large Town Districts one in every sixteen; in the Small Town Districts one in every fourteen; in the Mainland-Rural Districts one in every ten, and in the Insular Rural Districts one in approaching every nineteen.

Tables V*a*., V*b*., and VI. afford some further insight into the rate and distribution of such births in Scotland. Thus in the Principal Towns the highest rate of illegitimacy during the year occurs in Aberdeen, where 10·4 per cent. of the total natal events are of this nature; followed by Dundee with 9·4 per cent.; Edinburgh with 8·6 per cent.; Glasgow with 7·8 per cent.; Perth with 7·3 per cent.; Leith with 6·4 per cent.; Kilmarnock with 4·8 per cent.; Paisley with 4·6 per cent.; Greenock with 4·0 per cent.; and Glasgow Landward and Suburban with 3·8 per cent.

In the case of the counties, Table VI. shows how the proportion of illegitimate births to the total varies in each, the lowest 4·42 per cent. occurring in Ross and Cromarty; the highest 16·55 per cent. in Wigtown; followed by Banff with 14·25 per cent.; Elgin with 13·77 per cent.; Kirkcudbright with 13·43 per cent.; Aberdeen with 13·38 per cent.; and Kincardine with 13·26 per cent. In sixteen counties the rate is under 8 per cent., the lowest being in Linlithgow 5·36 per cent.; Shetland 5·20 per cent.; Sutherland 4·74 per cent.; Renfrew 4·55 per cent.; and Ross and Cromarty 4·42 per cent.

Of the 125,986 births registered throughout Scotland during the year, 64,769 are males, and 61,217 females, being in the proportion of 105·8 of the former to every 100 of the latter. Among the legitimate alone the

| SCOTLAND . . . | 3·124 | 7·66 | 105·8 | 105·7 | 107·2 | 90·8 | 8899 |

ratio is nearly the same, 105·7, while among the illegitimate it is 107·2 male to every 100 female births. The greatest proportion of male to female births in Scotland occurred in the Insular-Rural Districts, viz., 117·2 to 100, the smallest in the Principal Town Districts 103·6 to 100.

During the year, throughout the country there were 1386 cases of multiple births; in 1372 of these twins were produced, and in 14 triplets, so that the number of mothers bearing live children during the year is 124,586, of whom one in every 91 bore twins, and one in every 8899 bore triplets.

Births were registered in Scotland during each month as follows:—8·93 per cent. of them during April, 8·84 per cent. during June, 8·74 per cent. during May, 8·69 per cent. during March, 8·66 per cent. during January, 8·46 per cent. during July, 8·38 per cent. during October, 8·09 per cent. during December, 7·99 per cent. during September, 7·95 per cent. during August, 7·71 per cent. during February, and 7·56 per cent. during November. When the months are equalized to a common length of 31 days, 9·10 per cent. of the births were registered in April, 9·01 per cent. in June, 8·63 per cent. in May, 8·57 per cent. in March, 8·54 per cent. in January, 8·35 per cent. in July, 8·27 per cent. in October, 8·14 per cent. in September, 7·98 per cent. in December, 7·87 per cent. in February, 7·84 per cent. in August, and 7·70 per cent. in November.

The birth-rate for each ten thousand of population in the following European States is, for the year, 381 in Austria, 377 in Prussia, 373 in Italy, 370 in the German Empire, 337 in the Netherlands, 310 in Denmark, 296 in Belgium, 282 in Switzerland, and 226 in France.

## MARRIAGES.

The marriages registered as taking place in Scotland during 1891 number 27,969, an increase of 500 over those of the previous year, and affording a marriage-rate of 69·35 per ten thousand of population, the

highest rate since the year 1883. The mean average rate for the last ten years is 67 per ten thousand of the population.

This rate varies much in the five districts into which the whole country is divided for registration purposes. Thus in the Principal Town Districts it is 83·78 per ten thousand of the inhabitants of the same; in the Large Town Districts it is 73·91; in the Small Town Districts it is 64·30; in the Mainland-Rural Districts it is 52·67; and in the Insular-Rural Districts it is 35·84 per ten thousand as estimated. When compared with last year a larger rate is found to occur in each, with the exception of the Principal Town Districts in which it is not quite so high.

In the counties, as seen in Table VI., the rate varies from 82 per ten thousand of the inhabitants of Lanarkshire, the highest, to 30 per same rate in Sutherlandshire, the lowest. In six counties the rate is higher than that for Scotland, viz., in Lanark with 82 as just stated, Edinburgh with 80, Linlithgow with 78, Forfar with 74, Stirling with 73, and Ayr with 70. The lowest rate occurs in Nairn and in Ross and Cromarty, each with 43 per ten thousand, Caithness with 41, Argyll with 39, and Sutherland with 30. In eighteen counties the rate is above that in the same for last year, in fifteen it is below.

Table Va. enables a comparison being made as in the varying rate of marriage among the population in the Principal Towns of Scotland, and where we find that Glasgow comes first with a rate of 92·4 per ten thousand of its population, followed by Edinburgh with one of 89·2, Dundee coming next with a rate of 83·7, Aberdeen 82·8, Greenock 80·4, Kilmarnock 79·9, Paisley 77·5, Leith 72·3, Glasgow Landward and Suburban 66·3, and Perth 63·0.

| 1888 | 25305 | 0·6408 | 11647 | 5052 | 2876 | 2464 | 783 | 1724 | 0 | 759 |
| 1889 | 26344 | 0·6620 | 11846 | 5263 | 3004 | 2653 | 791 | 1943 | 3 | 841 |
| 1890 | 27469 | 0·6862 | 12408 | 5347 | 3097 | 2791 | 768 | 2025 | 0 | 1033 |
| 1891 | 27969 | 0·6935 | 12698 | 5415 | 3207 | 2692 | 788 | 2050 | 0 | 1119 |

The fertility of marriage is computed in the usual manner. The number of marriages registered during 1885 is 25,304, and legitimate births during 1891, the present year, are 116,339, so that $\frac{116339}{25304}$ gives 4·60 as the average fertility of each marriage, or 4·60 children were born to every 100 marriages. In England the average number of children born to each marriage was, for the same year, 4·43, or 443 to every 100 marriages.

Table X. shows the number of marriages as performed during the year in Scotland by the clergy of the various denominations, as also the proportions corresponding thereto. Thus of the whole 27,969 ceremonies, 12,698, or 45·40 per cent., were celebrated by ministers of the Established Church; 5415, or 19·36 per cent., by those of the Free Church; 3207, or 11·47 per cent., by those of the United Presbyterian Church; 2692, or 9·62 per cent. by clergy of the Roman Catholic Church; 788, or 2·82 per cent. by those of the Episcopal Church; 2050, or 7·33 per cent. being performed by clergy of other denominations; while 1119, or 4·00 per cent. of the whole are of an irregular nature.

---

TABLE XII.—Proportion of Marriages, 1855–1891. Percentage of Marriages contracted in Scotland according to the Rites of the several Religious Denominations during each of the Years 1855–1891.

| 1891 | 45·40 | 19·36 | 11·47 | 9·62 | 2·82 | 7·33 | 0·00 | 4·00 |

When compared with last year the ratios for the present show an increase in the celebrations in accordance with the rites of the Established Church, United Presbyterian, Episcopal Church, and of irregular marriages; a falling off occurring in the case of the others.

On referring back, over the last thirty-six years, it is found that 45·52 per cent. of all the marriages which have been registered in Scotland were performed in accordance with the customs of the Established Church, 22·04 per cent. in accordance with those of the Free Church, 13·02 per cent. in accordance with those of the United Presbyterian Church, 9·33 per cent. with those of the Roman Catholic Church, 2·42 per cent. with those of the Episcopal Church; in 6·21 per cent. the officiating clergyman was of some other denomination mentioned than of any of the foregoing; in 0·24 per cent. the denomination of the officiating clergyman was not stated; while 1·21 per cent. of the marriages were irregular in character. Table XA. which is again given, indicates the number and percentage of marriages as performed in the Counties and Principal Towns in accordance with the rites of the various religious denominations. In each of the counties of Shetland, Aberdeen, Kincardine, Argyll, Haddington, Peebles, Dumfries, Kirkcudbright, and Wigtown, over 60 per cent. of the marriage ceremonies were performed by ministers of the Established Church, and in eleven more between 50 and 60 per cent.; while in two, Sutherland and Ross and Cromarty, the percentage is under 20. Marriages performed by ministers of the Free Church are most prominent in the counties of Sutherland and Ross and Cromarty, in the former of which 86 per cent., and in the latter 79 per cent., are

| TOTAL . | 27969 | 27969 | 13365 | 13365 | 3470 | 3470 | 5411 | 5411 | 5272 | 5272 | 451 | 451 |

registered; the next highest percentages are in Caithness, 59, and Inverness, 56, respectively. In twenty-one counties the celebrations in accordance with the forms of this church are under 20 per cent. The largest proportion of marriages performed by ministers of the United Presbyterian Church occur in Shetland, 21 per cent.; in Selkirk, 24 per cent.; in Orkney, 29 per cent.; and Kinross, 34 per cent. In sixteen counties the ratio is between 10 and 20 per cent., being below this in the remainder. Marriages in accordance with the rites of the Roman Catholic Church are in the highest ratio in Forfar, 11 per cent.; in Lanark, 16 per cent.; in Dumbarton, 17 per cent.; and in Renfrew, 18 per cent.; while in Shetland, Orkney, Caithness, Sutherland, Ross and Cromarty, Kincardine, and Kinross, there are none or almost none. The ceremonies as performed by clergy of the Episcopal Church are most in evidence in Roxburgh and Aberdeen, where 4 per cent. of all fall under this heading; Perth and Forfar each with 5 per cent.; Edinburgh with 6 per cent.; and Kincardine with 7 per cent. There are no marriages in connection with this church in Orkney, Sutherland, Ross and Cromarty, Nairn, and Kinross. Marriages performed by clergy of other denominations than the above are most marked in Shetland, Caithness, Aberdeen, Forfar, Stirling, Renfrew, Ayr, Lanark, and Selkirk. Irregular marriages occur to the largest extent in Elgin, Aberdeen, Forfar, Kinross, Renfrew, Lanark, and Edinburgh.

Among the Principal Towns, in Aberdeen, Leith, Perth, and Kilmarnock, over 40 per cent. of the marriages are solemnised by ministers of the Established Church, the same being lowest in Glasgow and Paisley. Free Church celebrations are most in Edinburgh, Perth, Kilmarnock, and Glasgow Landward and Suburban, in each of which the ratio is over 20 per cent.; the lowest occurring in Glasgow and Dundee. Unions in accordance with the formulæ of the United Presbyterian Church bulk most largely in Leith, Paisley, Perth, and Glasgow Landward and Suburban, viz., 14 per cent. or over, and do least so in Aberdeen, and Greenock. Marriages as performed under the auspices of the Roman Catholic Church are in greatest proportion in Glasgow, Dundee, Paisley, Greenock, and Glasgow Landward and Suburban, viz., 15 per cent. or over, being least so in Aberdeen and Leith. Episcopal

| TOTAL | 100·00 | 100·00 | 100·00 | 100·00 | 100·00 | 100·00 | 100·00 | 100·00 | 100·00 | 100·00 | 100·00 | 100·00 |

Church marriages are most marked in Edinburgh, Dundee, and Perth, viz., 6 per cent. and over, and are least so in Glasgow and Glasgow Landward and Suburban. Marriages in accordance with other denominations are chiefly in Dundee, Aberdeen, Paisley, and Greenock; while irregular marriages mostly occur in Glasgow and Edinburgh, least so in Kilmarnock.

Table XIII. indicates how 1734, or 6·2 per cent., of the bridegrooms were under 21 years of age at marriage, 14 of them being below 18 years, and 151 between 18 and 19 years of age. 5450, or 19·0 per cent., of the brides were under 21 years of age, 4 of them apparently not having attained the age of 16 years, and 51 were between 16 and 17 years of age.

From Table XIV. it is seen that while in Scotland 2·49 in every 100 of the men married did so under 20 years of age, 11·24 is the corresponding ratio with the women, exceeded in the case of both sexes in the Principal and Large Town Districts; as also in that of the latter sex in the Small Town Districts. Between 20–25 years 35·28 per 100 of the men married in Scotland, and 44·83 per 100 of the women did likewise, proportions exceeded in the Large and Small Town Districts, and that in the case of both sexes. Between 25–30 years the rate among the men is 32·79 per 100, and among the women 26·17, ratios exceeded in the case of the former in the Small Town and Mainland-Rural Districts, in that of the latter in the two Rural Districts. Between 30–35 years the rate falls to 14·10 per 100 in the case of the men, and 9·26 in that of the women, and at all ages after this the fall continues rapid and great.

The contracting parties in 24,183 of the marriages registered throughout Scotland during the year were bachelors and spinsters, in 740 they were bachelors and widows, in 2248 widowers and spinsters, and in 782 widowers and widows; or 86·46 per cent. of the marriages were between bachelors and spinsters, 2·65 per cent. between bachelors and widows, 8·04 per cent. between widowers and spinsters, and 2·80 per cent. between widowers and widows.

The largest proportion of widows married was in Renfrew, where 5·94 per cent. of the brides were such; in Clackmannan they were 6·50 per cent.; in Lanark, 7·73 per cent.; and Bute, 9·28 per cent. In Caithness and

| TOTAL | 888218 | 100·00 | 888218 | 100·00 |

Kinross no widows re-entered the married state. In Edinburgh, 5·69 per cent. of the brides were widows, while in Glasgow, 8·64 per cent. were the same.

Table XVIII. is prepared as usual with the intention of indicating, from an educational point of view, the condition of those who married during the year, as shown by the proportion of bridegrooms and brides who write. Thus for all Scotland, 96·59 per cent. of the husbands and 94·34 per cent. of the wives signed their names to their Marriage Registers, leaving 3·41 per cent. of the former and 5·66 per cent. of the latter who contented themselves by making use of their *mark* instead of writing on the same occasion. The Mainland-Rural Districts stand first in this respect, inasmuch as 98·07 per cent. of the men and 96·91 per cent. of the women wrote, leaving 1·93 per cent. and 3·09 per cent. respectively to use *mark*. The Insular-Rural Districts are at the other extreme, as but 86·70 per cent. of the men and 74·72 per cent. of the women acted in the first manner, leaving 13·30 per cent. and 25·28 per cent. respectively to act in the latter. The three Urban Districts stand in regard to this matter upon a comparatively even level. In the Counties of Orkney, Kinross, Peebles,

and Selkirk, all the bridegrooms signed their names, and in Kinross and Peebles the brides did likewise. The Counties of Ross and Cromarty and Inverness show the worst record in this way; in the former, but 85·37 per cent. of the husbands and 64·48 per cent. of the wives signed, leaving 14·63 per cent. and 35·52 per cent. respectively not doing so; and in Inverness-shire, which is a little better, 89·60 per cent. of the former and 79·67 per cent. of the latter wrote, leaving 10·40 per cent. and 20·33 per cent. respectively, who were apparently only able to adhibit their *mark.* In the two lower lines of the Table, the cities of Edinburgh and Glasgow are in the same way compared. In the former 98·80 per cent. of the men and 98·20 per cent. of the women married wrote, leaving 1·20 per cent. of the first and 1·80 per cent. of the second to use *mark;* and in Glasgow, the corresponding rates are 95·17 per cent. and 91·55 per cent. for the men, and 4·83 per cent. and 8·45 per cent. for the women.

14·84 per cent. of the marriages were registered during June, 13·45 per cent. during January, 11·90 per cent. during December, 10·54 per cent. during July, 7·88 per cent. during November, 7·35 per cent. during April, 6·55 per cent. during August, 6·38 per cent. during September, 6·10 per

The proportion of marriages per ten thousand of their population was, in the following European States during 1891, as follows:—82 in Prussia; 81 in the German Empire; 77 in Austria; 75 in France and Italy; 74 in Belgium; 72 in Switzerland; 71 in the Netherlands; and 66 in Norway.

## DEATHS.

The total number of deaths registered throughout Scotland during 1891 was 83,573, which affords a mortality-rate of 2·07 per cent., *i.e.*, 207 in every ten thousand of the population, or one death in every 48 of the inhabitants of the country. This is the highest death-rate since the year 1878.

Of the total, 41,122 are males, and 42,451 females, the death-rate among the former being 211 per ten thousand of like sex, and among the latter 203. For the last ten years immediately preceding the present, the mean death-rate is 192 per ten thousand. In England the rate for the present year is equivalent to 202 per ten thousand persons living.

---

TABLE XIX.—Deaths of Males and Females in Scotland, and its Five Groups of Districts, during each of the Years 1855–1891.

The number of deaths as they occur in the five Great Registration Di isions or Districts are as follows:—in the Principal Town Districts the total number of registered deaths is 36,598, forming a mortality-rate in the same of 229 per ten thousand of the living population; the male deaths alone are 18,018, equivalent to a rate of 237 per ten thousand of the same sex; the female deaths are 18,580, or 222 per ten thousand of their population. In the Large Town Districts, the deaths number 10,215, equal to 218 per ten thousand of population; the males alone are 5040, or 220 per ten thousand; the females 5175, or 216 per ten thousand. In the Small Town Districts, the deaths amount to 17,119, or 203 per ten thousand; the males 8414, or 207 per ten thousand; the females 8705, or 200 per ten thousand of the sex alive. In the Mainland-Rural Districts, the deaths are 17,390, equal to 174 per ten thousand of inhabitants; the male deaths being 8604; or 174 per ten thousand; the female 8786, or 173 per ten thousand. In the Insural-Rural Districts the deaths are 2251, or 179 per ten thousand; the males 1046, or 178 per ten thousand; and the females 1205, or 179 per ten thousand. The rate is, accordingly, highest in the Principal Town Districts, falling in the Large and Small Town Districts; that in the Insular-Rural, however, being higher than in the Mainland-Rural Districts. The mortality-rate in the Urban Districts collectively is equivalent to 220 per ten thousand of their inhabitants as estimated, in the Rural Districts to

174. Table XX. thus indicates how in Scotland and in each of the five Registration Districts, the male death-rate is greater than that of the female, except in the Insular-Rural Districts, in which the reverse holds; the female death-rate being somewhat higher than in the opposite sex. In the Principal Town Districts and Large Town Districts the death-rate of both sexes is above the corresponding for Scotland as a whole, the reverse being the case in the other three districts.

Tables XXI. and XXII. afford information as to the deaths and the corresponding mortality-rates in each of the Principal Towns. In Glasgow, the total registered deaths during the year are 14,324, equal to a mortality-rate of 25 per thousand of the estimated population; in Edinburgh the deaths are 5646, at the rate of 22 per thousand of population; in Dundee they are 3516, equal to 23 per thousand; in Aberdeen they are 2422, at a rate of 20 per thousand; in Leith they are 1395, equivalent to 20 per thousand; in Paisley they are 1780, or 27 per thousand; in Greenock they are 1430, or 23 per thousand; in Perth they are 625, or 20 per thousand; in Kilmarnock they are 619, or 22 per thousand; and in Glasgow Landward and Suburban, the total deaths amount to 4841, or at the rate of 21 per thousand of the inhabitants resident therein.

Tables XXIII. and XXIV. give the number of deaths and the corresponding percentages at various ages in Scotland, and in each of the Registration Districts. Thus in Scotland, the rate of mortality among male infants under one year of age is 16·614 per cent. of all of the same sex presumed to be alive at this age during the year; while among the females the corresponding ratio is 13·203 per cent. A higher death-rate at this age occurs in the Principal Town Districts, where it is 19·376 per cent. and 15·603 per cent. respectively, and in the Large Town Districts 16·798 per cent. and 14·052 per cent. The lowest rate is found in the males in the Insular-Rural Districts, 11·734 per cent., and in the females in the Mainland-Rural Districts, 9·157 per cent. In none of the districts does the female death-rate at this age equal or exceed that of the male.

Under two years of age the male rate for Scotland has fallen to 5·881 per cent. and the female to 5·794 per cent. of each sex alive at this age, ratios again exceeded as to both sexes in the Principal and Large Town Districts. In the two Rural Districts the female death-rate overtops that of the male.

Under three years of age the rate for Scotland is, in the case of the males, 2·212 per cent., and of the females 2·348 per cent., exceeded only in the Principal Town Districts. At this age the female rate exceeds the male in the Principal Town Districts, Large Town Districts, and in the two Rural.

Under four years of age the difference in mortality-rate between the sexes is but slight, being, in the case of the males, 1·441 per cent., and of the females, 1·491 per cent., exceeded in both sexes in the Principal Town Districts, and in that of the females in the Large Town Districts; in all the districts, except in that of the Principal Towns, the female rate is above the male rate.

Under five years of age the rate for Scotland is, in the case of the males,

| ALL AGES | 41122 | 42451 | 18018 | 18580 | 5040 | 5175 | 8414 | 8705 | 8604 | 8786 | 1046 | 1205 |

0·983 per cent., and of the females 1·130 per cent., exceeded in both in the Principal Town Districts, and by the males alone in the Large Town Districts. In each district the female death-rate is over that of the male.

During the first quinquennial period of life (0–5 years) the proportion of deaths to those alive at the same age in Scotland was, in the case of the males, 5·612 per cent., and of the females 4·916 per cent., ratios which have fallen during the following period, 5–10 years, to 0·574 per cent. in the males, and 0·623 per cent. in the females, exceeded in the case of both sexes in the Principal and Large Town Districts, and slightly by the females in the Small Town Districts, and in each district, except that of the Principal Towns, the female rate is over that of the male. Between 10–15 years the rate attains its minimum, 0·376 per cent. for the males, and 0·416 per cent. for the females, again exceeded by both sexes in the Principal and Large Town Districts, and the female death-rate is also greater than that for the male in each district. Between 15–20 years the rate begins to rise, and is still highest in the Urban Districts, and the rate for the males in the Insular-Rural Districts is above that for the same sex for Scotland. Between 20–30 years the rate for Scotland is 0·788 per cent. for males, and 0·782 per cent. for females, exceeded in the case of both sexes in the Large Town Districts, by the males in the Small Town Districts and Insular-Rural Districts, and by the females in the Principal Town Districts. In the Principal Town Districts alone does the female rate exceed the male. Between 30–40 years the mortality-rate in the Principal Town Districts is over that for Scotland and for both sexes, and in each district, except the Insular-Rural Districts, the female exceeds the male rate. After 40 the mortality-rate at each age begins to increase with great rapidity, and continues to do so, and as a general rule, the male death-rate at all ages exceeds that of the female of the same years.

Table XXVII. affords similar information as to the Principal Towns, where it is seen that in Dundee the heaviest infantile mortality occurred

during the year, inasmuch as 20·32 in every 100 of those alive there during the first year of life succumbed, followed by Glasgow where the rate is 16·69; Greenock, 16·16; and Paisley, 15·78 per 100; the lowest being in Glasgow Landward and Suburban, 13·86; Kilmarnock, 13·50; and Perth 11·43, in like proportion. During the second year of life, the greatest mortality is in Glasgow, 8·86 per 100, and Paisley, 11·19; the lowest in Aberdeen, 3·93, and Perth, 2·64. The mortality among the young during the first five years of life is heaviest in Dundee, 6·51 per cent.; in Glasgow, 6·99 per cent.; and Paisley, 7·69 per cent.; lowest in Leith, 4·86 per cent.; Kilmarnock and Aberdeen, each 4·72 per cent.; and Perth, 3·78 per cent.

Table XXV. affords somewhat similar information, but the proportions of deaths here given at each age are to the total deaths. Thus in Scotland, in every 100 deaths among the males 22·15 occur to infants during the first year of life; 16·49 being the corresponding ratio among the females. This infantile mortality is exceeded in each of the Urban Districts, and that for both sexes; the lowest occurring in the Insular-Rural Districts, where 15·02 in every 100 male deaths, and 9·55 in every 100 female, are at this early age. Taking the mortality during the first five years of life, the rate for Scotland and for the males is 34·84 per cent., that for the females 28·72 per cent., exceeded in the case of the males in each Urban District, and of the females in the Principal and Large Town Districts, the more crowded parts; while in the more sparsely populated Insular-Rural Districts the death-rates at this age are at a minimum, 21·61 per cent. in the case of the males, and 16·68 per cent. in that of the females. When we compare the whole Urban mortality with that in the Rural Districts at the same age (0–5 years), we find that in the case of the males in the former 37·6 per cent. die thus early, as compared with 25·3 per cent. in the Rural Districts, the corresponding rates among the females being 31·5 per cent. and 19·5 per cent. respectively. The lowest rate occurs between 10 and 15 years of age, and that in Scotland and in each district, except the females in the Insular-Rural, in which the rate for the same in the following quinquennial period

is under that for the above. The greatest rate is found between 60–70 years, and in the Urban Districts generally, but in the Rural Districts it is during the following decennial period 70–80 years. Again, after 70 years of age, it is seen from the table how, in every 100 deaths among either sex at all ages, a greater proportion of those occurs among the females than among the males, 16·43 per cent. being the proportion of the former, 22·36 per cent. that of the latter.

rate in the Principal Town Districts is 2294 per hundred thousand, and is higher than in any other of the Registration Districts, Urban or Rural. The lowest rate is in the Mainland-Rural Districts, viz., 1737 in like proportion.

12,029 deaths from Zymotics were registered in Scotland during the year, being 292 more than during the previous year, and giving a death-rate of 301 in every hundred thousand of the population, the male rate alone being 291, and the female 311, together constituting 14·54 per cent. of all the specified deaths. (Tables XXVIII. and XXIX.) This rate is exceeded in each of the Urban Districts and that for both sexes, and in every district the female rate is above that of the male.

The number and proportions of deaths from the chief Zymotics and from ordinary causes are so arranged in Table XXXII. as to exhibit the mortality due to each during five of the successive periods of life. Thus of the total 12,029 Zymotic deaths, 6554 occurred during the first five years of life, 911 between 5–10 years, 264 between 10–15 years

---

TABLE XXX.—Proportion of Deaths from different Diseases to the Population in the Principal Towns of Scotland during the Year 1891, allowing for Causes not Specified.

2458 between 15–60 years, and 1842 at greater ages than this, or 54·5 per cent. of all deaths from Zymotics occurred during the first five years of life, 7·6 per cent. during the following quinquennial period, 2·2 per cent. between 10–15 years, 20·4 per cent. between 15–60 years, and 15·3 per cent. at ages above this. So that of the whole, 64·3 per cent. occurred during the first fifteen years of life. Table XXXIII. shows that 24·79 per cent. of the deaths between 0–15 years were due to Zymotics, and 8·21 per cent. at ages over 15 years.

Hooping-Cough caused the largest number of such deaths, 2437 thus succumbing, 2278 of these, or 93·5 per cent. of all died during the first five years of life, and 149 or 6·1 per cent. during the next quinquennial period. Measles is the ascribed cause of 1775 exits, 1539 or 86·7 per cent. of those between 0–5 years, and 187 or 10·6 per cent. between 5–10 years, while 38 deaths from this disease are registered as between 15–60 years. Diarrhœa and Dysentery caused 1710 deaths, 1131 or 66·2 per cent. at ages 0–5 years, 40 or 2·3 per cent. between 5–15 years, 207 or 12·1 per cent. between 15–60 years, and 332 or 19·4

---

per cent. at ages over 60. Fevers together caused 939 deaths, 799 of these being Enteric or Typhoid, 107 Typhus, 23 Simple or Ill-Defined, 4 Relapsing and 6 Cerebro-Spinal. 45 or 5·6 per cent. of the Typhoid deaths are registered as during the first five years of life, 99 or 12·4 per cent. between 5–10, and also between 10–15 years, 524 or 65·6 per cent. between 15–60 years, and 32 or 4 per cent. at greater ages. Of the Typhus deaths 10 occur during the first fifteen years of life, 88 or 82·2 per cent. between 15–60 years, and 9 at greater ages; *i.e.*, 90·6 per cent. of them occur after the age of 15. Diphtheria caused 830 deaths, 545 or 65·7 per cent. of these during the first quinquennial term of life, and 205 or 24·7 per cent. during the following, leaving 80 or 9·6 per cent. at greater ages. Scarlet-Fever caused 736 deaths, 430 or 58·4 per cent. of them between 0–5 years, 194 or 26·4 per cent. between 5–10 years, 58 or 7·9 per cent. between 10–15 years, and 54 at ages over this. Syphilis is the ascribed cause of 214 deaths, 180 or 84·1 per cent. of them during the first five years of life, and 33 or 15·4 per cent. at ages over 15. Erysipelas caused 326 deaths, 120 or 36·9 per cent. between 0–5 years, 107 or 32·8 per cent. between 15–60 years, and 93 or 28·5 per cent. at ages over 60. Croup caused 620 deaths, 522 or 84·2 per cent. between 0–5 years, 92 or 14·8 per cent. between 5–10 years, and 3 during each of the periods 10–15 years and 15–60 years. The deaths from other diseases than Zymotics and Croup amount to 70,924, of which 19,443, or 27·4 per cent. occurred during the first five years of life, 1859 or 2·6 per cent. between 5–10 years, 1527 or 2·2 per cent. between 10–15 years, 23,987 or 33·8 per cent. between 15–60 years, and 24,108 or 34·0 per cent. at ages over 60.

Of every hundred thousand of the inhabitants of Scotland, 301 are estimated to have died during the year from Zymotic diseases in one form

---

or other, which is equal to 14·54 per cent. of the specified deaths. In the Principal Town Districts the rate is 330 per hundred thousand or 14·40 per cent., in the Large Town Districts it is 331 per hundred thousand of population, or 15·20 per cent.; in the Small Town Districts it is 325 to population, or 15·95 per cent. of specified deaths; in the Mainland-Rural Districts it is 223, or 12·86 per cent.; and in the Insular-Rural Districts the rate per hundred thousand of population is 285, the percentage to the total specified deaths being 15·92.

Tables XXX. and XXXI. show the proportion of deaths from Zymotics, &c., in the Principal Towns of Scotland. Thus in Glasgow there were 366 deaths of this nature registered during the year, for every hundred thousand of the inhabitants as estimated, and equal to 14·49 per cent. of the specified deaths which occurred therein. Hooping-Cough accounts for 86 of the proportion, Measles for 78, Diarrhœa and Dysentery for 44, Scarlet-Fever for 37, Fevers for 30 (25 of these being Enteric and 4 Typhus), and Diphtheria for 23.

In Edinburgh 291 in every hundred thousand of the population succumbed to Zymotics, or 13·52 per cent. of the specified deaths were of this nature: 61 of this proportion were due to Hooping-Cough, 26 to Measles, 25 to Diarrhœal Affections, 20 to Diphtheria, and 18 to Scarlet-Fever, as also to Typhoid Fever.

In Dundee 263 per hundred thousand died from Zymotics, 11·68 per cent. of the total deaths being so accounted for. Hooping-Cough is the cause of 83 as above, Diarrhœa and Dysentery of 55, Fevers of 21 (15 being Enteric and 5 Typhus), Diphtheria of 19, Scarlet-Fever of 5, and Measles of 1.

Aberdeen exhibits 233 as the total proportional mortality from diseases of this nature, or 11·79 per cent. of all the deaths are due to them. Of these Scarlet-Fever and Hooping-Cough each account for 32, Diarrhœa and Dysentery for 25, Diphtheria for 13, Fevers for 12 (11 of these Typhoid), and Measles for 2.

In Leith, the proportion to population from Zymotic deaths is 228, equivalent to 11·49 per cent. of the total deaths, of which Hooping-Cough accounts for 90 in like proportion, Diarrhœal Affections for 29, Fevers for 27 (21 being Typhoid and 3 Typhus), Diphtheria for 23, Scarlet-Fever for 7, and Measles for 4.

In Paisley, 594 deaths per hundred thousand of its inhabitants occurred from Zymotics during the year, equal to 22·25 per cent. of the total specified mortality. Of this Measles accounts for 345, Hooping-Cough for 75, Diarrhœa and Dysentery for 57, Fevers for 25 (22 of these being Enteric), Diphtheria for 15, and Scarlet-Fever for 13.

In Greenock the proportion to population is 314, or 13·95 per cent. of all the deaths were ascribed to Zymotics. Of this 65 are due to Diarrhœa and Dysentery, 63 to Hooping-Cough, 33 to Scarlet-Fever, 28 to Measles, 25 to Fevers (17 being Typhus and 8 Enteric), and 22 to Diphtheria.

In Perth, 312 is the ratio as before, or 15·46 per cent. of the total mortality, 81 being from Diarrhœal Affections, 42 from Diphtheria, 16 from Hooping-Cough, as also Fevers (13 Enteric and 3 Typhus), 13 from Scarlet-Fever, and 10 from Measles.

In Kilmarnock, 442 is the rate in which such deaths occurred per hundred thousand of population, or 20·23 per cent. of the total deaths: 114 of this proportion is due to Diarrhœa and Dysentery, 75 to Fevers (67 Typhoid and 4 each to Typhus and Simple Continued), 43 to Diphtheria, 36 to Hooping-Cough, 18 to Measles, and 4 to Scarlet-Fever.

In Glasgow Landward and Suburban the proportion is 331, or 15·63 per cent. of the total mortality is due to Zymotics. Hooping-Cough accounts for 105 of the above proportion, Measles for 58, Diarrhœal Affections for 39, Diphtheria for 29, Scarlet-Fever for 22, Fevers for 21 (17 Typhoid and 4 Typhus).

There was no death from Small-pox throughout Scotland during 1891.

Hooping-Cough caused 2437 deaths in Scotland during the year, males

1889, and had much increased throughout the following year 1890, attains this year a still greater prominence in our Tables of Causes of Death, no fewer than 2508 being ascribed to it;—males 1172, females 1336—and together forming a mortality-rate of 60 per hundred thousand of the inhabitants, and equal to 2·88 per cent. of all the specified deaths which occurred during the year. In 2387 of the above 2508, the deaths were directly ascribed to Influenza, 1118 of them being males, and 1269 females, while in the remaining 121 cases—54 males, and 67 females—though not the only cause, this affection was mentioned as one cause, and as in last year's report we have included them all in the total number 2508, and Table XXXIIA is drawn up to afford further information on the subject. There it is seen, as regards the period of mortality, that during January 22 deaths are registered, during February 44, during March 61, during April 48, during May 154, during June 241, during July 107, during August 43,

| 1873 | 1,126 | | |

during September 36, during October 44, during November they suddenly mount up to 602, and during December 1106; so that there were apparently two distinct exacerbations or outbreaks of the disease during the year, one during the months of May and June, the other during November and December. On inquiry as to how the deaths were distributed throughout the five Primary Registration Districts, we find that of the 22 deaths registered during January—11 males and 11 females—9 are in the Principal Town Districts, 4 in the Small Town Districts, 7 in the Mainland-Rural Districts, and 2 in the Insular-Rural Districts. During February, in which the deaths of 22 males and 22 females are registered, 9 occur in the Principal Town Districts, 7 in the Large Town Districts, 12 in the Small Town Districts, 13 in the Mainland-Rural Districts, and 3 in the Insular-Rural Districts. Of the 23 males and 38 females during March, 12 are in the Principal Town Districts, 7 in the Large Town Districts, 8 in the Small Town Districts, 29 in the Mainland-Rural Districts, and 5 in the Insular-Rural Districts. Of the 24 males and 24 females in April, 5 are in the Principal Town Districts, 3 in the Large Town Districts, 5 in the Small Town Districts, 24 in the Mainland-Rural Districts, and 11 in the Insular-Rural Districts. Of the 83 males and 71 females in May, 60 are in the Principal Town Districts, 15 in the Large Town Districts, 25 in the Small Town Districts, 42 in the Mainland-Rural Districts and 12 in the Insular-Rural Districts. Of the 117 males and 124 females in June, 89 are in the Principal Town Districts 15 in the large Town Districts, 53 in the Small Town Districts, 77 in the Mainland-Rural Districts, and 7 in the Insular-Rural Districts. Of the 50 males and 57 females in July, 37 are in the Principal Town Districts, 12 in the Large Town Districts, 21 in the Small Town Districts, 30 in the Mainland-Rural Districts, and 7 in the Insular-

Rural Districts. Of the 25 males and 18 females in August, 12 are in the Principal Town Districts, 3 in the Large Town Districts, 9 in the Small Town Districts, 13 in the Mainland-Rural Districts, and 6 in the Insular-Rural Districts. Of the 17 males and 19 females in September, 14 are in the Principal Town Districts, 2 in the Large Town Districts, 7 in the Small Town Districts, 12 in the Mainland-Rural Districts, and 1 in the Insular-Rural Districts. Of the 23 males and 21 females in October, 17 are in the Principal Town Districts, 5 in the Large Town Districts, 14 in the Small Town Districts, and 8 in the Mainland-Rural Districts. Of the 287 males and 315 females in November, 229 are in the Principal Town Districts, 80 in the Large Town Districts, 144 in the Small Town Districts, 146 in the Mainland-Rural Districts, and 3 in the Insular-Rural Districts. Of the 490 males and 616 female deaths from Influenza, registered during December, 286 are in the Principal Town Districts, 140 in the Large Town Districts, 257 in the Small Town Districts, 395 in the Mainland-Rural Districts, and 28 in the Insular-Rural Districts. The total deaths from this disease in each District during the year are 779 in the Principal Town Districts, equal to a death-rate of 48 per hundred thousand of the inhabitants of the same, or 3·48 per cent. of the certified deaths which occurred there; in the Large Town Districts they are 289, or at the rate of 59 per hundred thousand, and equal to 2·72 per cent. of the total deaths; in the Small Town Districts the deaths number 559, or 61 per hundred thousand, and 3·01 per cent.; in the Mainland-Rural Districts they are 796, or 76 per hundred thousand, and 4·39 per cent.; and in the Insular-Rural Districts

the deaths from Influenza are 85 in all, or at the rate of 70 in every hundred thousand of the inhabitants, and form 3·93 per cent. of the total certified deaths in the same. In the Counties—29 deaths are registered during the year from Influenza in Shetland, or 6 per cent. of the total specified deaths in the same, 16 or 3 per cent. in Orkney, 9 or 1 per cent. in Caithness, 13 or 4 per cent. in Sutherland, 25 or 2 per cent. in Ross and Cromarty, 63 or 5 per cent. in Inverness, 2 or 1 per cent. in Nairn, 29 or 4 per cent. in Elgin, 43 or 5 per cent. in Banff, 189 or 4 per cent. in Aberdeen, 36 or 6 per cent. in Kincardine, 185 or 3 per cent. in Forfar, 110 or 5 per cent. in Perth, 152 or 4 per cent. in Fife, 10 or 7 per cent. in Kinross, 13 or 3 per cent. in Clackmannan, 76 or 3 per cent. in Stirling, 55 or 3 per cent. in Dumbarton, 79 or 5 per cent. in Argyll, 17 or 4 per cent. in Bute, 97 or 2 per cent. in Renfrew, 140 or 3 per cent. in Ayr, 396 or 2 per cent. in Lanark, 52 or 5 per cent. in Linlithgow, 362 or 4 per cent. in Edinburgh, 35 or 5 per cent. in Haddington, 35 or 6 per cent. in Berwick, 24 or 9 per cent. in Peebles, 25 or 5 per cent. in Selkirk, 64 or 6 per cent. in Roxburgh, 65 or 4 per cent. in Dumfries, 28 or 4 per cent. in Kirkcudbright, and 34 or 5 per cent. of the total certified deaths in Wigtown. Of the total 2508 deaths from Influenza, during the year, 176 or 7 per cent. of the whole succumbed during childhood, 0–5 years; 106 or 4 per cent. during adolescence, 5–20 years; 856 or 34 per cent. during adult life, 20–60 years; and 1370 or 55 per cent. at ages over 60 years.

Measles is the cause of 1775 deaths during the year, males 904, females 871, equivalent to 44 in every hundred thousand of the population or 2·14 per cent. of the specified deaths. The Principal and Large Town Districts show the heaviest mortality-rate from this disease, being 57 in the former and 52 in the latter, the lowest occurring in the Mainland-Rural Districts where it is 19.

Diarrhœal Affections account for 1710 deaths, males 803, females 907, together giving a rate of 43 per hundred thousand of population, and forming 2·07 per cent. of all the deaths. The rate is highest in the Large Town Districts 50, and Small Town Districts 56, while it is lowest in the Insular-Rural Districts, viz., 16 per hundred thousand.

From Fevers together there are 939 exits, males 501, females 438, together forming a death-rate of 24 per hundred thousand of population, or 1·14 per cent. of the total deaths. The highest rate is in the Large Town

---

TABLE XXXVII.—Deaths from Fever in 1891.

| FEVERS. | RURAL DISTRICTS. | | TOWN DISTRICTS. | |
|---|---|---|---|---|
| | Deaths from each Fever. | Percentage to Total Fever Deaths. | Deaths from each Fever. | Percentage to Total Fever Deaths. |
| Typhus | 9 | 5·23 | 98 | 12·78 |
| Enteric | 153 | 88·96 | 646 | 84·22 |
| Relapsing | 1 | 0·58 | 3 | 0·39 |
| Cerebro-Spinal | – | 0·00 | 6 | 0·78 |
| Simple or Ill-defined | 9 | 5·23 | 14 | 1·83 |
| ALL FEVERS | 172 | 100·00 | 767 | 100·00 |

Districts 31, and Small Town Districts 28, the lowest in the Main-and-Rural Districts 15. Typhus caused 107 deaths, equal to 3 in every hundred thousand of population, while Enteric or Typhoid caused 799, or 20 in like proportion, and most marked in the Large Town Districts where the rate is 27, being lowest in the two Rural Districts, in each of which it is 14. The male deaths from Typhoid are 430, the female 369. Table XXXVII. shows how, in the Rural Districts, 5·23 per cent. of the total fever deaths are due to Typhus, and 88·96 per cent. to Typhoid or Enteric; the corresponding proportions in the Urban Districts being 12·78 per cent. and 84·22 per cent. respectively.

Diphtheria caused 830 deaths, 364 males and 466 females, together giving a rate of 21 in every hundred thousand of population, or 1·00 per cent. of the total deaths. The highest ratio is in the Large Town Districts, viz., 27, and the lowest in the Insular-Rural Districts, 8, in like proportion. Scarlet Fever caused 736 deaths, or 18 in every hundred thousand of the population, and equal to 0·89 per cent. of the total specified deaths, males 358, females 378. The highest rate for this Zymotic is in the Principal Town Districts and Large Town Districts, being 25 in the former and 21 in the latter, lowest in the Mainland-Rural Districts, viz., 10 per hundred thousand of the inhabitants of the same.

The deaths from Cancer number 2703, the males 1010, the females 1693, together forming a death-rate of 68 per hundred thousand of population, or 3·27 per cent. of the certified deaths. The rate is highest in the Principal Town Districts and Mainland-Rural Districts, being in each 70 per hundred thousand, and lowest, 61, in both the Small Town Districts and Insular-Rural Districts. In the Principal Towns, as shown in Tables XXX. and XXXI., this disease is proportionately most fatal in Edinburgh, where in each hundred thousand of its inhabitants 97 so perished; followed by Dundee with a rate of 82; Leith 77; Aberdeen and Greenock each 76; Perth 65; Glasgow and Paisley each 60; Kilmarnock 57; and Glasgow Landward and Suburban 55.

Diseases of a Tubercular nature caused 10,141 deaths, males 4998, females 5143, together giving a mortality-rate of 254 per hundred thousand of population, or 12·26 per cent. of total deaths. The ratios in the five Registration Districts are as follows:—302 per hundred thousand of population in the Principal Town Districts; 284 in the Large Town Districts; 246 in the Small Town Districts; 178 in the Mainland-Rural Districts; and 189 in the Insular-Rural Districts. From Phthisis alone 7361 deaths are caused, males 3501, females 3860, and equal to 184 deaths per hundred thousand of population, or 8·90 per cent. of all certified deaths, being most

---

TABLE XXXVIII.—Monthly Deaths from Fever in Eight of the Principal Towns of Scotland during the Ten Years 1882–1891; specifying those from Typhus and Enteric Fever.

| MONTHS. | Total Fever Deaths. | Typhus. | Enteric. | MONTHS. | Total Fever Deaths. | Typhus. | Enteric. |
|---|---|---|---|---|---|---|---|
| January . | 317 | 63 | 244 | July . . | 221 | 43 | 165 |

| March . . | 260 | 70 | 180 | September . | 295 | 42 | 244 |
| April . . | 262 | 75 | 176 | October . | 353 | 39 | 310 |
| May . . | 238 | 61 | 168 | November . | 329 | 50 | 268 |
| June . . | 212 | 46 | 155 | December . | 358 | 54 | 287 |

pronounced in the Principal and Large Town Districts, least so in the Mainland-Rural Districts. In the case of the males who succumb to this disease 11·0 per cent. do so at ages under 15 years, 68·0 per cent. at ages between 15 and 45, and 21·0 per cent. at ages above 45; the corresponding ratios among the females being 14·5 per cent., 71·4 per cent., and 14·1 per cent. respectively. In the Principal Towns, Phthisis is the cause of a large proportion of the mortality occurring in each, thus in Glasgow 9·64 per cent. of the certified deaths are thus accounted for, in Edinburgh the percentage is 8·81, in Dundee 10·14, in Aberdeen 8·64, in Leith 9·77, in Paisley 9·49, in Greenock 8·13, in Perth 6·92, in Kilmarnock 9·79, and in Glasgow Landward and Suburban 10·44. Tabes Mesenterica caused 858 deaths throughout Scotland, males 447, females 411, most marked in the Urban Districts. Tubercular Meningitis killed 1242 persons, males 679, females 563, and except in the Insular-Rural Districts, the males suffered more in proportion than the females from it. From Scrofula, and other forms of Tuberculosis, 680 deaths occur, males 371, females 309.

To Diseases of the Brain and Nervous System 9482 deaths are ascribed, males 4754, females 4728, and affording a mortality-rate of 237 per hundred thousand of population, or 11·46 per cent. of the total specified deaths, exceeded in the Principal and Large Town Districts, in the former of which 262, and in the latter 274 in every hundred thousand of population died from the same. In the towns the heaviest mortality-rate for such diseases occurred in Paisley, where in every hundred thousand of the inhabitants, 315 succumbed during the year; followed by Greenock with 288; Glasgow Landward and Suburban with 280; Dundee with 269; Glasgow with 267; Perth with 263; Kilmarnock with 243; Edinburgh with 239; Aberdeen with 236; and Leith with 215. Apoplexy was the cause of death of 1309 males and 1473 females; Paralysis of 967 males and 1100 females; and Convulsions of 598 males and 479 females.

Diseases of the Circulatory System—Heart and Blood-Vessels, were the cause of 6964 deaths, males 3279, females 3685, being at the rate of 174 per hundred thousand living, or 8·42 per cent. of the specified deaths were of this nature. This rate is exceeded in the Small Town Districts and Mainland-Rural Districts, being in the former 185, and in the latter 182, in the other three it is below that for Scotland. In the towns the highest rate occurs in Perth, where 208 deaths from the above were registered

---

TABLE XXXIX.—The Twenty-two most fatal Causes of Death in Scotland in 1891, arranged in the order of their fatality.

| DISEASES. | Proportion of Deaths to 100,000 living. | DISEASES. | Proportion of Deaths to 100,000 living. |
|---|---|---|---|
| Bronchitis | 233 | Influenza | 60 |
| Phthisis | 184 | Paralysis | 52 |
| Diseases of Heart, &c. | 174 | Measles | 44 |
| Pneumonia | 141 | Diarrhœa and Dysentery | 43 |
| Age | 125 | Tubercular Meningitis | 31 |
| Violent Deaths | 74 | Enteritis | 31 |
| Apoplexy | 70 | Convulsions | 27 |
| Cancer | 68 | All Liver Diseases | 24 |
| Atrophy and Debility | 65 | Tabes Mesenterica | 22 |
| Hooping-cough | 61 | Diphtheria | 21 |
| Developmental Diseases of Children | 61 | Enteric Fever | 20 |

during the year, for every hundred thousand of its inhabitants, followed by Edinburgh with a rate of 207; Kilmarnock with one of 200; Leith with 178; Paisley with 177; Dundee with 169; Aberdeen with 167; Glasgow Landward and Suburban with 158; Glasgow with 157; and Greenock with one of 131.

From Diseases of the Respiratory Organs, excluding Phthisis, there were 17,904 deaths, the males 9209 and the females 8695, giving a mortality-rate of 448 per hundred thousand of population, or 21·64 per cent. of the specified deaths are of this nature. The proportion in the five Registration Districts and for both sexes together, are, in the Principal Town Districts, 567 or 24·73 per cent.; in the Large Town Districts 450 or 20·66 per cent.; in the Small Town Districts 400 or 19·66 per cent.; in the Mainland-Rural Districts 320 or 18·40 per cent.; and in the Insular-Rural Districts 267 or 14·90 per cent. Of these affections Bronchitis caused 9309 deaths, males 4398, females 4911; Pneumonia a total of 5642, males 3243, females 2399; while Croup caused 620 deaths, males 328, females 292. Among the Principal Towns, Glasgow shows the highest rate of such mortality, viz., 697 per hundred thousand of population, or 27·59 per cent. of the total deaths registered therein during the year, followed by Paisley with ratios of 567 or 21·24 per cent.; Dundee with 549 or 24·41 per cent.; Greenock with 531 or 23·62 per cent.; Glasgow Landward and Suburban with 498 or 23·53 per cent.; Edinburgh with 488 or 22·65 per cent.; Kilmarnock with 485 or 22·19 per cent.; Aberdeen with 448 or 22·63 per cent.; Leith with 421 or 21·19 per cent.; and Perth with 409 or 20·29 per cent.

To Diseases of the Digestive System 5560 deaths are ascribed, males 2684, females 2886, being at the rate of 139 per hundred thousand of population, or 6·73 per cent. of all the certified deaths. This mean rate for Scotland is exceeded by that in the Principal and Small Town Districts, the reverse holding good in the other three. Among the Principal Towns the highest mortality from the above occurs in Greenock, viz., 191 deaths in every hundred thousand of population; followed by Aberdeen with 171; Glasgow with 164; Dundee with 147; Paisley with 145; Kilmarnock with 136; Edinburgh with 134; Leith with 124; Perth with 117; and Glasgow Landward and Suburban with 108. Enteritis caused 1219 deaths, Peritonitis 730, Hernia 152, Liver Diseases 956, and Ileus, Stricture of the Gut and Intussusception together 410.

Diseases of the Urinary Organs account for 1945 deaths, 1161 males and 784 females, together forming a mortality-rate of 49 in every hundred thousand of the population, and equivalent to 2·35 per cent. of the total deaths. Acute Nephritis caused 381 deaths, Bright's Disease 748, Calculus 34, diseases of Bladder and Prostate 330, while other specified diseases of the Urinary System account for 188.

Diseases of the Organs of Generation caused 230 deaths—males 18, females 212, of which 67 are from Ovarian disease.

From diseases incidental to Parturition, other than Puerperal Fever, to which 378 are due, 340 deaths occur, together giving a total of 718.

Diseases of the Organs of Locomotion (Bones and Joints), caused 463 deaths, males 258, females 205, and diseases of the Skin are the cause of 102 male and 136 female deaths.

To Developmental diseases, Old Age excluded, 2450 deaths are credited —males 1399, females 1051, of which Premature Birth accounts for 1975, Atelectasis for 139, Cyanosis for 60, Spina Bifida and other Congenital Defects for 276—males 153, females 123.

From Old Age 1878 men and 3128 women are said to have died, 36 of the former and 66 of the latter at ages between 95 and 100, and 14 of the men and 12 of the women are stated to have been 100 years or over. The age of one of the men was reported at his death to be about 105 years, one woman was 106 years and four 103 years at death.

To Violence 2940 deaths are credited in the persons of 2150 males and 790 females, being together at the rate of 74 per hundred thousand of population, that of the males alone being 112 and the females 38. The deaths due to Accident or Negligence are 2670, males 1973, females 697; and those due to Violence other than accidental are 270, males 177, females 93, and of these latter 27 are Homicidal and 243 Suicidal. Of the Accidental deaths 126 occurred in the persons of a like number of males in mines and quarries, 343 deaths were caused by railways, by other vehicles or by horses. Burns and Scalds account for 272 exits, and Drowning for 537 (in addition to which there are 79 Suicides by Drowning, 46 of the latter being males and 33 females); 53 males and 23 females were accidentally poisoned; while 12 of each sex committed Suicide by taking poison. The poisons which caused death accidentally were Opium or one of its alkaloids or preparations in the case of 20 males and 7 females, Belladonna in that of 1 male and 1 female, Aconite in that of 1 female, Chloroform in that of 1 male and 2 females, Strychnia in that of 1 male, Lead in that of 1 male, Carbolic Acid in that of 2 males and 3 females, Alcohol in that of 4 males, Phosphorus in that of 1 male and 2 females, Creasote in that of 1 male, Arsenic in that of 1 male and 1 female, Sulphuric Acid in that of 2 males and 1 female, Hydrochloric Acid in that of 3 males and 1 female, Ammonia in that of 1 male, Sucking Matches in that of 1 male, overdose of Epsom Salts in that of 1 female, Eating Mussels in that of 1 male, Coal Gas in that of 3 males, other Noxious Gases in that of 2 males and 1 female, the Poison not being particularized in that of 7 males and 2 females. The Poisons which Suicides had recourse to, in order to effect their purpose, were Opium by 7 males and 6 females, Strychnia by 2 females, Arsenic by 1 male, Sulphuric Acid by 1 male and 1 female, Carbolic Acid by 2 females, while in the case of 3 males and 1 female the exact poison is not stated.

---

TABLE XL.—Monthly Mortality and Mean Temperature in Scotland during 1891, compared with the Mean of the Ten Years 1881-1890.

| | YEAR 1891. | | | 1881–1890. | |
|---|---|---|---|---|---|
| MONTHS. | Mean Temperature. | Actual Deaths. | Proportion to 12,000 per Annum, or 1000 per Month. | Monthly Proportion of Deaths. | Mean Temperature. |
| | ° | | | | ° |
| January | 36·1 | 8228 | 1182 | 1157 | 37·5 |
| February | 41·6 | 6467 | 929 | 1052 | 37·9 |
| March | 37·0 | 7776 | 1117 | 1139 | 38·9 |
| April | 41·3 | 7061 | 1014 | 1052 | 43·1 |
| May | 46·8 | 6830 | 981 | 1031 | 49·0 |
| June | 55·6 | 6913 | 993 | 941 | 54·1 |
| July | 57·3 | 5783 | 831 | 916 | 56·5 |
| August | 55·6 | 5528 | 794 | 882 | 55·7 |
| September | 54·3 | 5493 | 790 | 847 | 52·6 |
| October | 46·7 | 5736 | 824 | 911 | 46·3 |
| November | 40·5 | 8205 | 1178 | 960 | 41·4 |
| December | 38·5 | 9523 | 1367 | 1112 | 37·0 |
| YEAR | 45·9 | 83,548 | 12,000 | 12,000 | 45·8 |

69 of the male Suicides and 26 of the female occurred in the Principal Town Districts; 20 male and 12 female in the Large Town Districts; 37 male and 16 female in the Small Town Districts; 39 males and 18 females in the Mainland-Rural Districts; and 3 males and 3 females in the Insular-Rural Districts.

## WEATHER AND ITS INFLUENCE ON THE MORTALITY.

The following remarks on the weather of 1891 are extracted from the Notes of the Astronomer-Royal, appended to the monthly Reports issued by the Registrar-General.

*January* was on the whole decidedly cold, with little wind, although a violent gale swept across the country on the 31st.

For the season, the month of *February* was calm, warm, and extremely dry. The high barometric pressure was very remarkable, for not only was it greater than in any month since 1856, but was also steadier than in any previous February.

*March* was a cold, windy month, with somewhat wide range of temperature, and a strangely steady barometer, in spite of frequent violent gales.

TABLE XLI.—Meteorology of Scotland for 1891, deduced from Observations made at 55 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also, the Number of Births, Deaths, and Marriages registered during each Month of the Year 1891, as stated in the Quarterly Reports,

| Marriages . . . . . | 3760 | 1496 | 1696 | 2055 | 1003 | 4148 | 2946 | 1831 | 1783 | 1705 | 2201 | 3325 | 27949 |
| Daily Births . . . . | 352 | 347 | 353 | 375 | 355 | 371 | 344 | 323 | 335 | 341 | 317 | 329 | 345 |
| Daily Deaths . . . . | 265 | 231 | 251 | 235 | 220 | 230 | 187 | 178 | 183 | 185 | 273 | 307 | 229 |

The month of *April* was marked by unusually high and steady barometric pressure, low mean temperature, and exceptional dryness.

*May* was an unusually cold month, with low and somewhat unsteady barometer, while rain and humidity have been normal in quantity.

The weather of *June* was on the whole somewhat warmer and much drier than usual at this season.

The weather of *July* was warm and dry, while the barometric pressure was nearly normal, though attended with rather greater fluctuations than are usual in this month. The mean temperature was higher than that of any July since 1887.

The weather of *August* was characterised chiefly by the excessive rainfall, while the temperature was low and the barometric pressure uniformly low during the first three weeks, but fluctuating considerably in the last eight days. With the exception of the July of 1889, the rainfall has not been exceeded since 1877. Storms of great violence for the season were experienced all over the country in the last week of the month, and with the accompanying rain inflicted great damage on the corn crops.

The weather of *September* was most unusually varied in character, the only feature common to all the towns being a high temperature, and a series of magnificently fine warm days extending from about the 10th to the 13th.

The month of *October* 1891 was remarkable for its repeated sudden gales, associated with corresponding violent fluctuations of the relatively low barometric pressure.

*November* was remarkable for the great range of barometric pressure, accompanied by frequent rains and unusual dampness of air.

The month of *December* 1891 was extremely wet, both as to the frequency of rains and their large amount. The somewhat low barometric pressure was very variable.

---

TABLE XLII.—Showing the connection between certain Atmospheric Phenomena, especially Temperature, and the Deaths from certain Diseases and Classes of Disease, in Eight of the Principal Towns of Scotland, during each Month of the Year 1891.

From Table XL. and several of the succeeding tables, some information may be extracted as to the connection between the comparative mortality from some diseases and the meteorological conditions of the successive months of the year, founded chiefly upon data furnished month by month from eight of the principal towns of Scotland. The first of those tables indicates the mean temperature of each month of the year, and for comparison there is given the mean of the preceding ten years. The mean for the year under review is 45°·9, almost the same as the mean for the ten years 45°·8. Six of the months during the year have a higher mean temperature than in the same for the ten years, and six have a lower. The summer and autumn months show a higher mean temperature than was the case for the mean of the ten years. The connection between the death-rate and climatic conditions is seen in Tables XLI. and XLII., and when the rates of monthly deaths are noted it is found that 11·40 per cent. of the whole are registered during December, 9·85 per cent. during January, 9·82 per cent. during November, 9·31 per cent. during March, 8·45 per cent. during April, 8·27 per cent. during June, 8·18 per cent. during May, 7·74 per cent. during February, 6·92 per cent. during July, 6·86 per cent. during October, 6·62 per cent. during August, and 6·58 per cent. during September.

By means of Table XLII. the occurrence of deaths from some of the more ordinary causes is seen in the eight towns for each month of the year. Thus Measles had its maximum of deaths during the spring and summer months, March, April, May, and June, its minimum during the autumnal months, August and September. Scarlet-Fever, as a rule, caused the majority of its deaths during the early and late months of the year, being highest during January, October, November, and December, which was also much the same with Diphtheria, and in both the summer months showed the fewest. Hooping-Cough, like Measles, had its maximum during March, April, May, and June, while Fevers were most fatal during the later months of the year, least so during the spring months, March and April.

TABLE XLIII.—Deaths, Temperature, and Fall of Rain in Eight of the Principal Towns of Scotland during each Week of the Year 1891; also the Proportion of Deaths to every Thousand of the Population.

| | | | | | | | | 53 | January 2 | 670 | 26·0 | 39·5 | 50·9 | 32·0 | 1·18 |

Diarrhœal Affections are, as usual, most fatal during the autumnal months of August, September, and October, least so during the early ones.

Phthisis or Consumption causes many deaths each month, the smallest number from this fell disease being registered during August, September, and October. Croup claims the majority of its victims during the early and late months of the year, the fewest deaths from it occurring during July and August.

Diseases of the Respiratory Organs were distinctly most fatal during the colder months of January, March, November and December, and much the same occurred in the case of those suffering from Disease of the Heart, and in both cases the minimum of mortality occurred during the warm autumnal months of August, September, and October, both classes of disease being, it is well known, affected by climatic conditions.

---

TABLE XLIV.—Monthly Mortality at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1891, and Proportion at each Age in every Hundred Deaths per Month.

| MONTHS. | Actual Number of Deaths in 1890. | | | | | Proportion at each Age in every Hundred Deaths per Month. | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 0–5 years. | 5–20. | 20–60. | 60 and above. | Total Deaths. | 0–5 years. | 5–20. | 20–60. | 60 and above. | Total. |
| January . . | 946 | 199 | 1062 | 833 | 3040 | 31·1 | 6·6 | 34·9 | 27·4 | 100 |

TABLE XLV.—Months equalised to 31 Days, and Deaths at each Age corrected thereto, in order to show the relative Mortality at each Age in Eight of the Principal Towns during each Month of the Year 1891.

| MONTHS. | Relative Number of Deaths in 1891. | | | | | Monthly Deaths proportioned to 1000 per Month or 12,000 per annum. |
|---|---|---|---|---|---|---|
| | 0–5 years. | 5–20. | 20–60. | 60 and above. | Total. | |
| January . . . | 946 | 199 | 1062 | 833 | 3040 | 1149 |
| February . . . | 915 | 223 | 872 | 587 | 2597 | 982 |
| March . . . | 1073 | 268 | 973 | 689 | 3003 | 1135 |
| April . . . | 1009 | 239 | 851 | 622 | 2721 | 1029 |
| May . . . | 991 | 237 | 885 | 537 | 2650 | 1002 |
| June . . . | 1015 | 259 | 907 | 602 | 2783 | 1052 |
| July . . . | 733 | 204 | 717 | 440 | 2094 | 792 |
| August . . . | 830 | 170 | 612 | 361 | 1973 | 746 |
| September . . | 827 | 187 | 638 | 394 | 2046 | 773 |
| October . . . | 871 | 184 | 714 | 463 | 2232 | 844 |
| November . . | 1086 | 255 | 1040 | 988 | 3369 | 1274 |
| December . . | 1067 | 224 | 1004 | 939 | 3234 | 1222 |
| YEAR . . | 11,363 | 2,649 | 10,275 | 7,455 | 31,742 | 12,000 |

Diseases of the Brain and Nervous System caused the largest number of deaths during January, March, June, November, and December.

The Aged succumbed, as may be supposed, in largest number during the three coldest months of January, November, and December, and least so during the warm autumnal months August, September, and October.

Tables XLIV. and XLV. are constructed with the purpose of indicating the number and proportion of those dying in these same towns at four series of ages, viz., in childhood, during adolescence, adult life, and among the aged. Thus the number of children, 0–5 years, who died during the year is 11,147 or 35·8 per cent. of the total deaths, the largest number of them occurring during the months of March, April, May, November, and December, months when Measles and Hooping-Cough among the Zymotics, as also Respiratory Affections generally, were most fatal.

The number of adolescents, 5–20 years, who died is 2597 or 8·3 per cent. of deaths at all ages, and these deaths were most marked during March, April, May, June, and November, months when Phthisis and Diseases of the Respiratory Organs, as Bronchitis and Pneumonia, claimed many victims.

Among those who died during adult life, 20–60 years, in all 10,081 or 32·4 per cent. of the whole, the heaviest mortality appears during the early and late months of the year.

The deaths of the aged, 60 and above, number 7314 or 23·5 per cent. of all, and are most numerous during the most inclement months of January, March, November, and December.

I have the honour to be,

SIR,

Your most obedient Servant,

R. J. BLAIR CUNYNGHAME, M.D.

GENERAL REGISTRY OFFICE OF BIRTHS, &c.
EDINBURGH, 15*th December* 1893.

# APPENDIX TABLES.

# VACCINATIONS IN SCOTLAND—1891.

| No. of Division, &c. | REGISTRATION GROUPS, DIVISIONS, AND COUNTIES. | Successfully Vaccinated. | Vaccination Postponed. | Insusceptible of Vaccine Disease: On the ground of Constitutional Insusceptibility. | Insusceptible of Vaccine Disease: In respect of the Children having already had Small-pox. | Insusceptible of Vaccine Disease: On the ground of previous Successful Vaccination. | Died before Vaccination. | Removed from District before Vaccination, or otherwise unaccounted for. | Total Births for 1891. |

Districts containing Parliamentary and Royal Burghs are printed in capitals, thus:—EDINBURGH. Districts containing Towns of 2000 Inhabitants and upwards are printed in small capitals, thus:—Carluke.

*N.B.*—An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated, or are comprised of more, or parts of more, than one Parish, and the component parts of these Districts will be found at page 454.

A dagger "†" is prefixed to those Districts which consist of only a part of a Parish of the same name.

* The actual number of Districts is 1051—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 5 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.
